

**MAILING FORM FOR NON-IMPACT PRINTING**

**ABSTRACT OF THE DISCLOSURE**

5           A mailing form for facilitating the mailing of a document is disclosed, the  
mailing form comprising a first panel, a second panel, and, a third panel of  
substantially the same area, each panel separated by a horizontal fold line. The  
mailing form includes a top ply of the mailing form and a document in the second  
panel. The mailing form further includes a bottom ply coupled to the top ply and  
10 a frame portion of the top ply. The mailing form further includes an adhesive on  
the outer edges of the front of the bottom ply extending over the second and  
third panel. The mailing form further includes a first horizontal fold line between  
the first and second panels and a second horizontal fold line between the second  
and third panels. When the mailing form is in folded form, the document in the  
15 second panel is securely situated between the first and third panel.
